Summary

Business Analytics professional with 4 years of experience in data analysis, ETL processes, and business intelligence reporting. Proficient in SQL, Python, Excel, Power BI, and Tableau for data preparation, statistical analysis, and dashboard development. Experienced in data validation, forecasting, regression analysis, and KPI reporting to deliver structured analytical insights.

Technical Skills

Analytics & Visualization:

Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Data Analysis ToolPak), Dashboard Development, Data Visualization, KPI Reporting, Business Intelligence Reporting

Programming & Data Analysis:

SQL, Python, R Programming, Statistical Analysis, Regression Analysis, Forecasting, Exploratory Data Analysis, Data Mining

Data Engineering & Database Tools:

Data Modeling, Data Cleaning, Data Validation, Data Extraction, ETL Concepts, Database Management, Entity Relationship Diagrams (ERD), Data Warehousing Concepts

Business Intelligence & Analytics Tools:

RapidMiner, Alteryx, SAP (Systems, Applications & Products), Salesforce, PowerPoint, Business Intelligence Tools

Construction & Domain Knowledge:

Project Controls, Cost Estimation, Budget Tracking, Schedule Monitoring, Resource Utilization Analysis, Construction Analytics, Project Performance Reporting

Engineering & Technical Tools:

STAAD Pro, AutoCAD, Revit

Experience

Tata Consultancy Services (TCS), Hyderabad, India.

Data Engineer

Feb 2020 – Jul 2023

- Supported data engineering and analytics initiatives for NXP Semiconductors, a global semiconductor manufacturer, by processing and analyzing operational and production datasets used across engineering and business teams.
- Conducted data analysis using Excel, Power BI, and Tableau, applying data cleaning, filtering, and pivot techniques to identify operational patterns, product performance trends, and reporting requirements.
- Extracted and processed large datasets from SQL databases and internal data sources, implementing ETL/ELT workflows to ensure accurate and structured data availability for analytics and reporting teams.
- Developed and automated data pipelines using Python, Alteryx, and ETL processes, improving data processing efficiency and reducing manual data handling tasks.
- Built and maintained interactive dashboards in Power BI, incorporating trend analysis, forecasting models, and KPI tracking to support monitoring of operational performance and production metrics.
- Designed and maintained relational database structures and data warehouse tables, improving data integrity, accessibility, and reporting efficiency across analytics teams.
- Utilized AWS services including AWS Glue, Amazon S3, and Amazon Redshift to support scalable data integration and data warehousing for semiconductor operational data.
- Applied dimensional data modeling techniques to organize production and operational datasets, improving analytical reporting and data accessibility.
- Monitored and maintained manual operational databases from AMEC and APAC regions, ensuring data accuracy, consistency, and timely updates for cross-regional reporting.
- Collaborated with global cross-functional teams including engineering, analytics, and business units to resolve data issues, optimize data workflows, and support enterprise reporting initiatives.
- Implemented data governance, validation, and security practices to maintain compliance with internal standards and protect sensitive operational data.

Education

- Master of Science in Business Analytics
Webster University, St. Louis, United States
- Bachelor of Technology in Civil Engineering
Guru Nanak Institutions Technical Campus, Hyderabad, India
